Subject: Status of Extension Request - Baker Trust Property

Dear Craig, if you will recall, on July 2, 2014, the EPA granted the property owner an extension of time to and including August 1, 2014 (today) for the completion of the characterization and removal work at the Baker Trust Property.

As of today, we have removed all the waste from the site in accordance with the terms of the Order. As also required by the Order, a completion report will be prepared within 21 days of the completion of all on-site work.

One item that still is awaiting completion is the installation of an HDPE liner to cover the pits that formerly housed the plating solutions. This specific item arose during an on-site meeting held on July 15. Based on that meeting, we proposed installation of the liner in our July 16th Work Plan Addendum.

Out of an abundance of caution, we would like to request that the final completion date for the work performed under the Order be considered to be August 29 in order to accommodate the installation of this cover. Although we obtained contractor quotes for the liner in July and we endeavored to schedule the work promptly, it appears that the work will not be able to be performed until the week of August 11th or, possibly, the week of August 18. The contractors that we got quotes from were booking a few weeks out due to their other commitments and time to obtain the materials.

Thank you for your consideration of this request.

Best,

Rick
